

BenzAluSysteme

We give aluminium the right shape profilines

Benz Alusysteme GmbH is your strong and reliable partner in every section referring to aluminium profiles – with over 40 years' experience.

Production

Our processing companies are capable of forming your individual profiles with a press capacity of 600 to 4500 tons. Cross sections with wall thicknesses from 0.5 to 30 mm and a profile width of 400 mm are possible.

Development

For supplying an efficient mass production, our specialized technicians provide you with professional and extensive advice from the beginning of your development. Making innovation out of ideas – this is our duty as well as our goal.

Surface treatment

After the pretreatment of the profiles (e.g. grinding, brushing, polishing) the surface can be anodized or powder coated as you like. During the anodizing a decorative surface is created. Furthermore this kind of treatment – as well as powder coating conductive materials with powder lacquer – works also as a protective layer.

Editing of profiles

To provide our customer with perfect service, we offer the editing of your profiles after the production:

- Sawing with small tolerances
- Flash removal
- Vibratory grinding
- Drilling (drilling and pipe thread tapping)
- Milling (copy- and CNC-milling)
- Stamping

We give solar energy the necessary base **solarlines**

We are specialized in manufacturing mounting systems for BiFacial modules. As the first German supplier we produce constructions synchronized for the special needs of these modules.

We support you from the dimensioning until the installation training and are ready to offer you help and advice:

- Structural analyses, if desired
- Approved by the building authorities

Your advantages with Benz-Solarsystems:

Flexibility

- Fast editing of you inquiry and order
- Variable mounting system, usable on every underground

Saving of costs

Developed for a fast installation from above, therefore minimum effort. Perfectly harmonizing components.

Maximum Lifetime and Quality

Other than wood or steel the high resistance to corrosion of aluminium provides a long lasting lifetime. Aluminium impresses not only because of its optic benefits but also because of a small effort for maintenance.

Warranty

We grant you a 10 years warranty of all or delivered fastening systems

BenzAluSysteme

We are glad to be at your service
